Core Competencies

Business Outlook

<i>Mission Statement</i>	ScienceCare is established to serve as a link between individual donors and medical researchers and educators. ScienceCare provides human tissues and organs to qualified medical researchers on an individual request basis. Requestors must submit a written request and completed transfer agreement prior to consideration for tissue release.
<i>Problems</i>	It is our charter to educate the public about the benefits of tissue donation and to place donated tissues with qualified medical researchers and educators in the endeavor to support the improvement of patient care.

Products and Services

<i>Drug Development</i>	<i>Which Drugs:</i> Neurological, sexual dysfunction, respiratory, and drug delivery <i>Describe:</i> Tissue recovered by ScienceCare are utilized in the drug discovery process to treat a wide variety of ailments
<i>Professional Services</i>	<i>Which Services:</i> ScienceCare recovers individual tissues and organs on an individual researcher request basis for medical research and educational purposes.
<i>Research</i>	<i>What Research:</i> Bioskills Medical Research Facility <i>Describe:</i> ScienceCare's Phoenix facilities offer a 6000 square foot surgical learning and research facility and adjoining conference area. The Bioskills Surgical Facility is designed to facilitate cadaveric surgical education and research.

Synergistic or Strategic Opportunities

Where would the best partners be located?

Although tissues provided by ScienceCare support the work of many academic, government, corporate and private researchers, it is our priority to support local Arizona research efforts. The majority of ScienceCare donors are ScienceCare residents and our policy is to give Arizona research requests the highest priority.

What kinds of partnerships are of interest?

Generally, we work very closely with researchers in order to offer the highest quality tissues available.
